Editors of the IGJR

Chief Editor

Jörg Tremmel holds two PhDs, one in philosophy and one in social sciences, and he is an Extraordinary Professor at Eberhard Karls University of Tübingen. From 2010 to 2016, Tremmel was the incumbent of a Junior Professorship for Intergenerationally Just Policies at the same university. Before, he was a research fellow at the London School of Economics and Political Science, both at its Centre for Philosophy of Natural and Social Science and (part-time) at the Grantham Institute for Climate Change Research. Tremmel's research interests lie mainly in political theory/political philosophy. In several papers, Tremmel proposed a "future branch" in democracies in order to represent the interests of future citizens in the legislative process. His most salient book is *A Theory of Intergenerational Justice* (2009).

Co-Editor

Grace Clover is a fourth year student reading History and Modern Languages at the University of Oxford. In 2022 she was the Ethics and Environment student representative at her college, focusing on sustainable food acquisition and sustainable investment. Besides her engagement in environmental activism, she is particularly interested in feminist political theory and theories of the family by authors such as Amia Srinivasan and Sophie Lewis. She is also an ambassador for the Foundation for the Rights of Future Generations.

Co-Editor

Markus Rutsche is an editor in legal publishing and a former academic. He holds an MA in political science, philosophy and protestant theology from University of Tübingen and a PhD in international affairs and political economy from University of St. Gallen (HSG). He wrote his doctoral dissertation on the problem of democratic stability in John Rawls. Besides his engagement with the theory and practice of political liberalism, he maintains a strong interest in the works of Robert Brandom, Jürgen Habermas, Charles Taylor and Alasdair MacIntyre.

The peer-reviewed journal *Intergenerational Justice Review* (IGJR) aims to improve our understanding of intergenerational justice and sustainable development through pure and applied research. The IGJR (ISSN 2190-6335) is an open-access journal that is published on a professional level with an extensive international readership. The editorial board comprises over 50 international experts from ten countries, representing eight disciplines. Published contributions do not reflect the opinions of the Foundation for the Rights of Future Generations (FRFG) or the Intergenerational Foundation (IF). Citations from articles are permitted upon accurate quotation and submission of one sample of the incorporated citation to FRFG or IF. All other rights are reserved.
